《KELME Pro Technology System》

PEBA-X

The outsole is made from ultra-lightweight PEBA-X material supplied by Arkema (France), widely used in aerospace and defense industries. It delivers powerful ground push-off and explosive acceleration for players. (Applied across the entire professional series)

KELME SKIN Upper

The upper features an ultra-thin 0.25 mm hot-melt film bonded directly onto the fabric through a specialized process, creating a firm exterior with a soft interior for enhanced fit and adaptive comfort.

KELME Nano Coating

Built upon KELME SKIN technology, an anti-slip nano coating is integrated to ensure reliable grip in both dry and wet conditions, enhancing ball control and passing precision. (Applied across the entire professional series)

KELME FLEX TOUCH FLEX TOUCH

FLEX TOUCH is KELME's proprietary softening technology. Through specialized processing, synthetic upper materials achieve superior softness and comfort, designed specifically for touch-focused football boots.

KELME One-Way Anti-Slip Insole

The insole uses 100% anti-slip yarn combined with a herringbone-pattern physical grip structure, preventing foot movement inside the boot even after intense sweating during matches. (Applied across the entire professional series)

KELME Friction Particle

Three-dimensional friction particles are embedded in the forefoot control zone, delivering enhanced grip for more precise passing and more powerful shooting.

KELME Dynamic Hyperknit-Pront **Hyperknit-Pront**

A professional-grade dynamic flywire system with tightly structured yarns ensures secure lockdown, while integrated dynamic water-resistance supports consistent performance in rainy conditions.

KELME SHUA Cushioning

KELME SHUA cushioning material is created through a specialized chemical foaming process, delivering enhanced shock absorption during take-off and landing phases.

KELME Energy Bar Support

A structural support fabric delivers lateral A-pillar support and B-pillar upper reinforcement while maintaining a soft, comfortable touch and long-term shape stability.

KELME TACK WEAVE

The forefoot control zone features KELME's new TACK WEAVE knitting technology with an adaptive fit system. A waterproof yet breathable membrane is embedded beneath the knit, ensuring precise ball control and all-weather performance.
